Identifying Forces: Understanding the Main Ideas

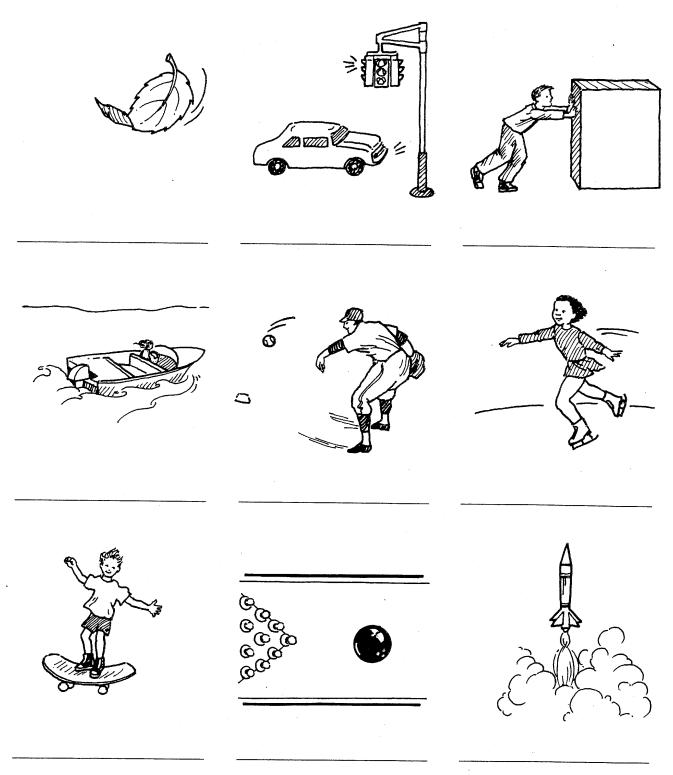

Identify the forces acting in each of the following situations. Then describe the effect of the forces.

| 5. whee | ls: ball bearings: rolling | |
| | | |
| 6. fluid: | liquid: gas | |
| | | |

Forces of Friction: Understanding the Main Ideas

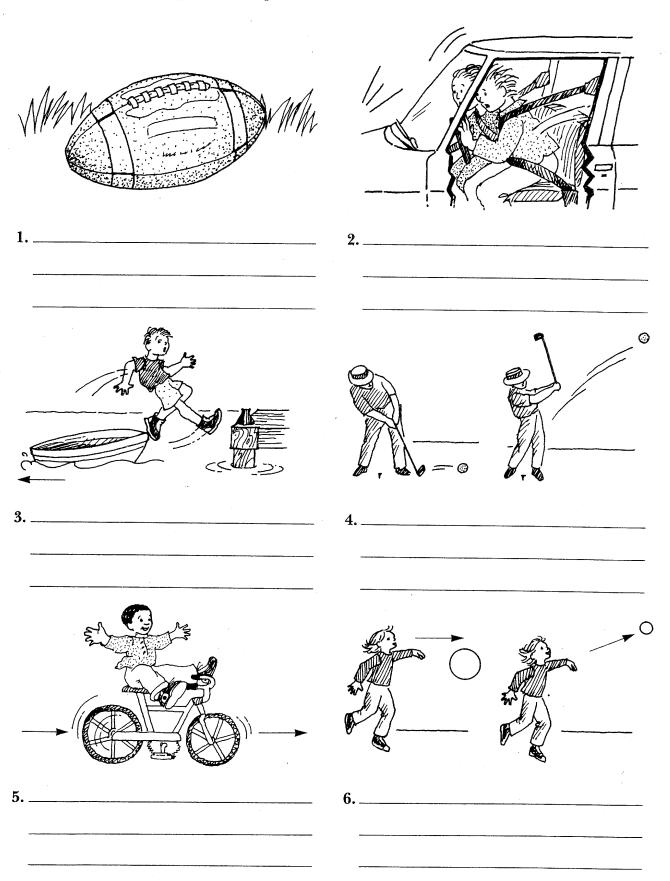

On each picture, draw an arrow to show the direction of the frictional force. Then name the type of friction—sliding, rolling, or fluid—that is acting in each case.

Falling Objects: Understanding the Main Ideas

Near the surface of the Earth, the acceleration due to gravity is 9.8 m/sec/sec. Use this information to complete the table below. Then use your data to make graph of velocity vs. time for a falling object.

Table 1: Falling Objects

| Time in Air (sec) | Velocity (m/sec) |
|-------------------|------------------|
| 1 | |
| 2 | |
| 3 | |
| | 39.2 |
| | 49.0 |
